SUMMARY

IT Business Analyst and Presales Consultant with ~4 years bridging stakeholders and engineering across Automotive, Logistics, HRMS and B2B platforms. I run requirement gathering, turn complex needs into clear specs and roadmaps, and lead cross-functional teams to on-time delivery. I also build my own products end to end, directing Claude as a coding agent from PRD to shipped code.

EXPERIENCE

Senior Business Analyst & Presales Consultant · PT Accelist Lentera Indonesia 06/2025 – 12/2025

- Led the full Requirement Gathering phase for a new Lexus unit implementation, adapting Toyota's existing business processes to the Lexus framework
- Conducted technical assessments for potential projects (small ERP for data management, Toyota ERP CR for Surat Jalan, Toyota ticketing for after-sales compliance) to define scope and solution proposals
- Acted as Technical Consultant in Presales, translating client needs into viable technology solutions and supporting internal tools integration design
- Redefined project scope and pre-requirement documentation, shaping early requirements for a streamlined, high-quality delivery
- Managed product delivery through UAT and Warranty phases: tracked issues, ensured bug fixes and led implementation training
- Headed project documentation and UI/UX design for cross-functional alignment, and supported development with test cases across sprints

Project Manager · PT Aplikasi Pekerja Indonesia (Jobseeker Company) 04/2024 – 12/2024

- Delivered **20+** product demos to prospective clients, increasing demo-to-deal conversion by **10%** within **3** quarters
- Analyzed feedback from **5** enterprise companies to identify **10+** customization needs, leading to a **15%** boost in product satisfaction
- Implemented a new documentation standard (timelines, product specs, UI wireframes), achieving **100%** on-time delivery across **5** milestones
- Led a team of **3** developers, improving sprint velocity by **20%** over **2** quarters through standardized backlog documentation
- Collaborated with UI/UX on **30** custom features and personally designed **10** mockup screens, reducing revision time by **25%**
- Maintained relationships with **5** key clients, achieving a **0%** churn rate during the project period

Freelance Associate Product Manager · Ginantech 12/2023 – 06/2024

- Benchmarked **5** competitor platforms to define business processes, reducing implementation complexity by **40%**
- Managed a **30+** item product backlog in ClickUp with an **80%** sprint completion rate; coordinated UI/UX on **12** screens
- Oversaw development of **3** MVP releases with **100%** on-time deployment; delivered **9** test reports catching **45+** bugs before production

Business Analyst · PT Accelist Lentera Indonesia 02/2022 – 09/2023

- Acted as liaison for **4** business-user teams across automotive and logistics, translating needs into **30+** technical user stories
- Joined **15** requirement-gathering workshops, improving requirement clarity and reducing rework by **20%**
- Created **30+** UI/UX wireframes in Figma within FSD, SRS, TSD and BRD documents, reducing design-to-development handoff errors by **30%**
- Conducted full-cycle testing for **3** enterprise modules, decreasing post-deployment bugs by **10%**
- Trained **50+** end-users, achieving **70%** system adoption within the first month of go-live

PERSONAL BUILDS (WITH CLAUDE)

Tama · Agentic AI desktop companion · github.com/philipuscahyadi02-hub/tama Shipped v1.0

Desktop companion that is a real agentic AI: chat with memory, a Claude Code terminal, Gmail/Calendar/Drive tools, a Telegram bot and productivity features, all running locally. Electron, Claude Agent SDK, MCP.

Onikiri · Two-thumb samurai reflex game · philipuscahyadi02-hub.github.io/onikiri Shipped · live

Prototyped first as a Claude Artifact, then shipped as a static, serverless game: daily seeded waves, skill-card builds, an oni boss, unlockables, synthesized audio and offline play, with all progress saved in the browser. JavaScript, HTML5 Canvas, Web Audio, PWA.

SNITCH · Social bluffing party game · snitchbylip.vercel.app Playable prototype

Phone-based party game for 4–8 players, designed end to end (game design doc, PRD, architecture, 21 screens) and built as a playable flow with a server-side Game Master. TypeScript, Supabase.

WangKu · Debt, subscription & paylater ledger · github.com/philipuscahyadi02-hub/wangku Postponed

Personal finance ledger built as an experiment with gstack (Claude Code agent skills) for CEO, engineering and design reviews. Next.js, Supabase with row-level security.

KEY CLIENT PROJECTS

- **PT Toyota Astra Motor:** Dealer Financing System: cross-system data mapping for credit transactions between manufacturer, dealers and banks; reporting dashboards
- **PT Toyota Astra Motor:** Dealer Financing Improvement: integration with banks' customer systems for seasonal credit, removing manual process steps
- **PT Toyota Astra Motor:** Networking System: employee data enhancement and reporting design
- **PT Isuzu Astra Motor Indonesia:** MY isuzuID: led the service booking feature; operational dashboard specs with dealers and service providers
- **Paramount Enterprise & Lion Super Indo:** Applicant Tracking System: product stability, user issues, feedback-driven upsell features
- **Adarton Asia Pacific & Geprekin:** HRMS: payroll, compensation and attendance specs; custom UI; post-sales delivery timelines
- **GinanTech · Accelist (internal):** B2B Platform benchmarking and user research; Procurement Management module

EDUCATION

Bachelor of Information Systems · BINUS University 2023

Focus: Business Intelligence · GPA: **3.49** / 4.00

SKILLS

Business & Analysis: Requirement Gathering, Process Mapping, User Story Writing, Stakeholder Management, UI/UX Collaboration, UAT & Manual Testing, Documentation (SOP, FSD, SRS, BRD), Agile & Scrum

Tools: JIRA, Confluence, ClickUp, Figma / Adobe XD, Notion, Microsoft 365, Google Workspace, SQL, REST APIs (JSON)

Building with Claude: Claude Code, Claude Agent SDK, MCP tool integration, Claude Design, Claude Artifacts, gstack skills, AGENTS.md / CLAUDE.md project rules, AI-assisted PRDs & decision logs, human-in-the-loop approval gates
