

SUMMARY

A results-driven professional with a strong foundation in Information Systems and a dedication to continuous technological exploration and relevance. I thrive as the key interface, prioritizing direct Stakeholder Communication to champion innovation and translate strategic needs into practical, high-impact digital solutions. Proven in bridging the gap between Presales discovery and technical execution—delivering across diverse sectors including Automotive, Logistics, HRMS, and B2B Platforms—my core strength lies in Solutioning complex challenges into actionable roadmaps. I am committed to leading cross-functional teams and ensuring the timely, high-quality delivery of all project deliverables

EXPERIENCE

06/2025 - 12/2025

Senior Business Analyst & Presales Consultant

PT Accelist Lentera Indonesia

- Led the full Requirement Gathering phase for a new Lexus unit implementation project, including adapting Toyota's existing business processes to the Lexus framework
- Conducted technical assessments for various potential projects (e.g., small ERP for data management, Toyota ERP CR for Surat Jalan, Toyota ticketing for after-sales compliance) to define scope and solution proposals
- Functioned as a Technical Consultant in Presales, translating client needs into viable technology solutions and supporting multiple internal tools integration design
- redefined the project scope and pre-requirement documentation to maximize efficiency, strategically shaping the early project requirements to ensure a streamlined and high-quality product delivery.
- Managed product delivery during the UAT and Warranty phases on an assigned project, acting as a supporting analyst to track issues, ensure bug fixes, and lead implementation training sessions
- Headed project documentation and UI/UX design to ensure robust specifications and cross-functional alignment for the new project
- Actively supported development and quality by creating test cases and providing testing support to developers throughout sprints.

04/2024 - 12/2024

Project Manager

PT Aplikasi Pekerja Indonesia (Jobseeker Company)

- Delivered over 20 product demos to prospective clients, increasing demo-to-deal conversion rate by 10% within 3 Quarter
- Analyzed feedback from 5 enterprise companies to identify 10+ customization needs, leading to a 15% boost in product satisfaction
- Implemented a new documentation standard—including project timeline, product specifications, and UI wireframes—to enhance cross-functional clarity and successfully ensure 100% on-time delivery across 5 project milestones
- Delegated tasks to a team of 3 developers, improving sprint velocity by 20% over 2 quarters by standardising new backlog documentation based on developer needs
- Collaborated with UI/UX team on 30 custom features; personally designed 10 Mockup project screens, reducing revision time by 25%
- Maintained active relationships with 5 key clients, achieving a 0% churn rate during the project period

12/2023 – 06/2024

Freelance Associate Product Manager

Ginantech

- Benchmarked 5 competitor platforms to define business processes, reducing implementation complexity by 40%.
- Managed product backlog of 30+ items using ClickUp, with 80% task completion rate per sprint.
- Coordinated with UI/UX team to design 12 screens
- Oversaw development cycles for 3 MVP releases, achieving 100% on-time deployment
- Conducted QA and delivered 9 detailed test reports, identifying 45+ bugs before production

02/2022 - 09/2023

Business Analyst

PT Accelist Lentera Indonesia

- Acted as liaison for 4 Business User team across automotive and logistics, translating business needs into 30+ technical user stories
- Joining 15 requirement-gathering workshops, improving requirement clarity and reducing rework by 20%
- Created 30+ UI/UX wireframes in Figma, embedded within FSD, SRS, TSD, and BRD documents to visually represent each user story. This approach improved team alignment during backlog grooming and reduced design-development handoff errors by 30%
- Conducted full-cycle testing for 3 enterprise modules, decreasing post-deployment bugs by 10%
- Trained over 50 end-users during training Session, achieving 70% system adoption within the first month of go-live.

TOOLS & SKILLS

Business & Analytical Skills

Requirement Gathering, Process Mapping, User Story Writing, UI/UX Collaboration, Stakeholder Management, UAT & Manual Testing, Documentation (SOP, Functional Specs), Agile & Scrum

Tools & Technologies

JIRA, Confluence, ClickUp, Figma/Adobe XD, Notion, Microsoft 365, Google workspace, SQL (DBMS), API (JSON),

PROJECT

PT Accelist Lentera
Indonesia

Internal Project

Procurement Management

Developing a new module to help the procurement process

External Project (Outsourcing)

PT. Toyota Astra Motor (Dealer Financing System)

Designed data mapping across systems to manage credit transactions between manufacturer, dealer, and banks. Delivered transaction reporting dashboards

PT. Toyota Astra Motor (Dealer Financing Improvement)

Developing new feature for TAM to integrate with banking customer system to integrate seasonal credit features. Cutting user manual business process by integration system

PT. Toyota Astra Motor (Networking System)

Contributed to employee data enhancement and reporting system design

PT. Isuzu Astra Motor Indonesia (Customer Application MY isuzuID)

Led service booking feature development; created operational dashboard specs and coordinated with service providers and dealers

GinanTech

Internal Project

B2B Platform

Conducted product benchmarking, user research interviews, and managed development backlog using ClickUp. Coordinated UI/UX design and developer alignment

Jobseeker Company

Paramount Enterprise International and Lion Super Indo

Applicant Tracking System (ATS)

Maintained product stability, resolved user issues, and drove upsell features based on feedback

Adarton Asia Pacific and Geprekin

Human Resource Management System (HRMS)

Translated client needs into technical specs (Payroll, Compensation, Attendance), co-designed custom UI, and led delivery timelines post-sales
